

Compact, reliable and AI-ready at its core.

Introducing Vertiv™ EnergyCore Li7, a compact lithium-ion battery cabinet with up to 17 modules, storing 222kW power for space-constrained facilities. 70% more compact than VRLA batteries, with reliable power supply for 7-10 mins runtime. It features a digital communication between battery cabinets for a rapid and accurate high-power draw support.

Power reliably.

keep it humming™

Shortened setup, safety-tested and longer life.

The Vertiv™ EnergyCore Li7 cabinet offers safe, long-lasting performance with factory-integrated battery modules for quick deployment. UL 9540A certified for thermal safety, it lasts 10-15 years, reducing replacement needs.

Features advanced Vertiv™ EnergyCore Battery Management System (BMS), integrated communication with power converters, and internal power supply for reliable energy storage and lower TCO.

Power that lasts.
